

# Filling head

## FILLING HEAD REX-FORMING-LINE

- Easy handling
- High portioning precision
- Short set-up times on the filling machine
- Increase in productivity
- A wide range of applications

## FILLING HEAD D 40 – A WIDE RANGE OF APPLICATIONS

The filling head from the REX-Forming Line is excellently suited for the portioning of tough to pasty masses, even with fillers. It is simply attached to the outlet of the REX-filling machine and pneumatically controlled. The electrical connection is via the filling machine.

## SHORT SET-UP TIMES ON THE FILLING MACHINE

Thanks to the variable outlet openings, the filling head can be optimally adjusted to each application. As a result, highest weight precision is guaranteed for all applications without dripping.

The filling head is suited for portioning the following process media:

- Different type of potato preparations (mashed potato, potato salad,...)
- Pies
- Sauces
- (ice) - cream
- Spreads
